

Duma Achieves Associate Status

Davis, Bowen & Friedel, Inc. (DBF) is pleased to announce the addition of a new Associate to the firm's Salisbury team: Robert J. Duma, P.E.

Now a senior municipal engineer licensed in Maryland and Delaware, Duma began his engineering career with DBF in 2005 by serving as an intern for the firm during his senior year at Parkside High School. Duma continued as a DBF intern each summer thereafter while he completed his engineering degree at the University of Maryland - College Park (UMCP). Upon completion of his Bachelors of Science in Civil Engineering, Duma joined DBF's municipal engineering department, and he immediately began working on a diverse range of civil engineering projects.

Duma currently serves as the Pretreatment Coordinator for Hurlock, Maryland, and Bridgeville, Delaware, where he monitors industrial users for the EPA's Pretreatment Program. Additionally, he provides engineering services to local communities such as the towns of Pittsville, Berlin, Hurlock, Crisfield and Henderson in Maryland. Duma has also served a key role in the Delaware towns of Selbyville and Georgetown by providing critical design elements while recently upgrading their water treatment plant processes.

"Rob has been great to work with from his days in the basement as an intern to sitting side-by-side discussing treatment plant designs," shared DBF Principal Jason P. Loar, P.E. "It is a pleasure seeing a young engineer grow, and I feel with employees like Rob, the future of DBF is bright."

Davis, Bowen & Friedel, Inc., is a full-service architectural, engineering, and surveying firm with offices in Salisbury and Easton, Maryland, and in Milford, Delaware. For additional information about DBF, visit www.dbfinc.com.
