

FOR IMMEDIATE RELEASE

Davis, Bowen & Friedel Welcomes McLaughlin

Ashton McLaughlin, P.E., recently joined Davis, Bowen & Friedel, Inc. (DBF) in their Milford, Delaware, office. A University of Delaware graduate with both Bachelor's and Master's degrees in Civil Engineering, she brings more than eight years as a project engineer to the firm and is experienced with the various aspects of project management which include, but are not limited to, drafting and the development and modification of designs, plans, and specifications.

Prior to joining DBF, McLaughlin provided seven years of service as a project engineer for the Delaware Department of Transportation (DelDOT). During her time with DelDOT, she was responsible for the review of design work prepared by outside consultants, planning and conducting research during the conceptual phase of project development, planning and coordinating design projects with the appropriate departments, and developing cost estimates for project time and materials.

"Since arriving at Davis Bowen & Friedel, Ashton has used her extensive design and public works knowledge in completing several State of Delaware on-call projects while also seamlessly integrating with the Milford Civil team," shared DBF principal Ring Lardner, P.E.

As a member of the DBF team, McLaughlin will continue to provide civil engineering services for a variety of projects on the Eastern Shore. She has already contributed to projects which include the design and construction of a vehicle storage building for the Dover Air Force Base's Fire Department, design and roadway improvements for a commercial venture in Camden, a parking lot rehabilitation for the Delaware State Police, and facility upgrades and re-design services for Delaware Health and Social Services.

During her free time, McLaughlin loves spending time with her dogs, Leonidas and Arnold, and her cat, Indy. She also enjoys camping, photography, music festivals and concerts, travelling, reading, and working on her home.

Davis, Bowen & Friedel, Inc., is a full-service architectural, engineering, and surveying firm, with offices in Milford, Delaware, and Salisbury and Easton, Maryland. Additional information can be found online at www.dbfinc.com.
