

DBF Welcomes Intern-to-Hire

Davis, Bowen & Friedel, Inc. (DBF) is pleased to announce that Keonte M. Henson, E.I.T. has joined the firm's engineering department in Easton, Maryland. His association with DBF began in 2017 as a summer intern returning for winter break until graduation in 2018.

Henson graduated from Johns Hopkins University, earning a Bachelor's degree in Civil Engineering and passed the Fundamentals of Engineering exam to obtain his Engineering-In-Training Certificate in May. During his time at JHU, aside from earning his degree, Henson helped develop and test lab procedures for the civil engineering department.

"We have enjoyed helping Keonte grow his skills over the years and we're very excited at the opportunity to bring him on board as a fulltime employee" noted Senior Project Manager/Coastal Engineer Ken Eaton, LEED Green Associate.

Since his employment as a design engineer, Henson has helped DBF with various projects. He has completed groundwater reports, permit applications, project cost estimates, and project manuals/specifications. He has also consulted on designs for projects such as the Stewart Pit Rubble Landfill in Easton, Maryland; the Easton Club Stormwater System Evaluation; the Riverside Boat Ramp in Salisbury, Maryland; and the Phillips Landing Boat Ramp in Laurel, Delaware.

Davis, Bowen & Friedel, Inc., is a full-service architectural, engineering, planning, and surveying firm with offices in Salisbury and Easton, Maryland, and in Milford, Delaware. For additional information about DBF, visit www.dbfinc.com.
